

Yoseph Ayalew

Software Engineer

yosefayalew56@gmail.com Addis Ababa, Ethiopia [GitHub](#) [GitLab](#) [LinkedIn](#)

Full-Stack Software Engineer with professional experience designing and building performant web applications using **Java**, **Vert.x**, **Angular**, **React**, **PostgreSQL**, and **SQL**. Passionate about clean architecture, crafting robust backend APIs, and building responsive, intuitive user interfaces that deliver real-world impact.

EXPERIENCE

Junior Software Developer **eTech SC** Mar 2026 – Present
Developing and maintaining software features across the full stack.

- Build and improve frontend components using Angular
- Develop backend APIs and services using Java and Vert.x
- Work with PostgreSQL databases and write complex SQL queries
- Debug, test, and resolve software defects
- Collaborate with developers using Git and GitLab; participate in code reviews

EDUCATION

BSc in Computer Science **St. Mary's University — Addis Ababa** 2020 – 2023
Focused on software development, algorithms, database systems, and data structures.

TECHNICAL SKILLS
