Yoseph Ayalew

Full-Stack Software Engineer

yosefayalew56@gmail.com • Addis Ababa, Ethiopia
github.com/Solohater • **linkedin.com/in/yoseph-ayalew**
Portfolios: **portfolio2-hazel-gamma.vercel.app** • **portfolio-6pnf.vercel.app**

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with professional experience engineering high-concurrency microservices, healthcare clinical systems, and cooperative financial platforms using **Java, Vert.x, PostgreSQL, Angular**, and **React**. Proven track record at **eTech SC** architecting reactive APIs, optimizing complex SQL queries, and delivering accessible frontend applications. Passionate about clean domain-driven architecture, resilient transaction ledgers, and performant user experiences.

TECHNICAL SKILLS

Languages:	Java (Core/Enterprise), TypeScript, JavaScript, SQL, Go
Frontend:	Angular, React, Next.js, Tailwind CSS, Redux, HTML5/CSS3
Tools & CI/CD:	Git, GitLab CI/CD, GitHub, Docker, Postman, Vercel, Render
Backend:	Java Vert.x (Reactive), Node.js, Express.js, REST APIs, JWT Auth
Databases:	PostgreSQL (Indexing & Optimization), Prisma ORM, MongoDB
Practices:	Microservices, Agile/Scrum, Code Reviews, Double-Entry Ledgers

PROFESSIONAL EXPERIENCE

Junior Software Developer — eTech SC

Mar 2026 – Present | Addis Ababa, Ethiopia

Enterprise Production Systems: eHealth & Financial SACCO Platforms

- **eHealth Clinical Systems (Chilalo Shed, Nubira, Meqrez Hospital):** Engineered high-throughput reactive backend microservices in **Java and Vert.x** handling multi-department patient triage, electronic health records (EHR), and prescription dispensing workflows.
- **Financial Cooperatives (Ethio-Trit, Netsebirak, Oromia Bank SACCO):** Developed core accounting modules ensuring strict double-entry transactional guarantees, automated loan amortization schedules, and dividend calculations across thousands of cooperative member accounts.
- **Database Engineering:** Designed normalized relational schemas in **PostgreSQL**; optimized complex analytical queries and created composite indexes, significantly improving reporting query response times.
- **Frontend Architecture:** Constructed modular, accessible user interfaces in **Angular** with reusable component systems and robust client-side validation for high-accuracy financial data entry.
- **Collaboration & Quality:** Participated in Agile sprint planning, daily standups, and rigorous peer code reviews on GitLab; debugged and resolved critical production defects to maintain high system availability.

SELECTED FULL-STACK PROJECTS

Document Management System
React • Node.js • Prisma ORM • PostgreSQL • JWT
Role-based approval workflow platform (Admin/Reviewer/Author) with secure JWT authorization, PostgreSQL relational schema, and live search indexing.

TechShop Commercial E-Commerce
TypeScript • Next.js • Tailwind CSS • Responsive UI
Full-featured electronics store with product search, cart state persistence, customer account management, and real-time order tracking.

Ethio Kemem — Bilingual Food Menu
TypeScript • Next.js • Tailwind CSS • Localization
Traditional culinary platform featuring full Amharic and English localization, categorized interactive ordering menus, and administrative dashboard.

Repair Management Portal
React • Node.js • Express • MongoDB • MERN
Field service portal featuring technician assignment, status tracking, role-based ticket management, and operational analytics dashboards.

EDUCATION

Bachelor of Science (BSc) in Computer Science — St. Mary's University

Addis Ababa, Ethiopia | Graduated 07/2023

Core Coursework: Algorithms & Data Structures, Distributed Systems, Relational Database Management, Object-Oriented Software Design.
